

RoHS Applicability & Compliance Statement

Rack Cabinets and Enclosure Systems

Document No	UP-RHS-RCK-2026-01
Issue Date	13 May 2026
Issued By	UPCOM Telekomunikasyon Bilisim Teknolojileri Sanayi ve Ticaret Limited Sirketi

1. Product Scope

- This statement applies to UPCOM passive rack cabinets and enclosure systems, including network cabinets, server cabinets, wall mount cabinets, outdoor cabinets and related mechanical accessories.
- Electrical or electronic accessories such as PDU units, fan units, thermostats, lighting kits and cooling units are not covered by this generic passive cabinet statement and should be supported by their own product-specific RoHS declarations.

2. Applicability Statement

UPCOM passive rack cabinets are primarily mechanical enclosure products. As supplied empty cabinet bodies and mechanical accessories, they are not treated as standalone electrical or electronic equipment in the same way as active RoHS-regulated devices. However, based on available supplier and material information, UPCOM states that the passive cabinet materials are controlled for the presence of RoHS-restricted substances to the extent applicable.

3. Restricted Substances Reference

- Lead (Pb)
- Mercury (Hg)
- Cadmium (Cd)
- Hexavalent Chromium (Cr6+)
- Polybrominated Biphenyls (PBB)
- Polybrominated Diphenyl Ethers (PBDE)
- Bis(2-ethylhexyl) phthalate (DEHP)
- Butyl benzyl phthalate (BBP)
- Dibutyl phthalate (DBP)
- Diisobutyl phthalate (DIBP)

4. Basis of Statement

- Supplier material declarations and coating information
- Internal product knowledge and component review
- Available documentation for passive cabinet materials and finishes

5. Limitations

For rack cabinet projects supplied together with active electrical or electronic accessories, separate RoHS declarations should be issued or obtained for those accessories. This document should therefore be used as a

passive cabinet material/applicability statement, not as a blanket declaration for all accessory-inclusive cabinet configurations.
