Roof compatibility

For 450 mm-deep wall cabinets, select a single fan. A 560 mm-deep Alpine Line wall cabinet accepts one or two fans. Oxoline 600 × 600 mm and 600 × 800 mm cabinets accept two- or four-fan modules. Check the roof opening and mounting-hole pattern for the chosen cabinet.

Airflow and selection

Nominal airflow per fan is 2.3 m³/min (138 m³/h). Delivered airflow depends on the air inlet and the resistance of the installed cabinet. For a quotation, specify the order code, cabinet model, quantity and delivery country.
